

2.1 PHARMACEUTICS II

Theory

1. Dispensing Pharmacy :

- (i) Prescriptions- reading and understanding of prescriptions: Latin terms commonly used (Detailed study is not necessary), Modern methods of prescribing, adoption of metric system. Calculations involved in dispensing.
- (ii) Incompatibilities in prescriptions - Study of various types of incompatibilities- physical, chemical and therapeutic.
- (iii) Posology-Dose and dosage of drugs, Factors influencing dose, calculations of doses on the basis of age, sex and surface area. Veterinary doses.

2. Dispensed Medications. :

(Note : A detailed study of the following dispensed medication is necessary. Methods of preparation with theoretical and practical aspects, use of appropriate containers and closures. Special labelling requirements and storage conditions should be highlighted).

(i) Powders - Types of Powders- Advantages and disadvantages of Powders, granules, cachets and Tablet triturates. Preparation of different types of powders encountered in prescriptions. Weighing methods, possible errors in weighing, minimum weighable amounts and weighing of a material below the minimum weighable amount, geometric dilution and proper usage and care of dispensing balance.

(ii) Liquid Oral Dosage Forms :

(a) **Monophasic** - Theoretical aspects including commonly used vehicles, essential adjuvant like stabilizers, colourants and Flavors, with examples.

Review of the following monophasic liquids with details of formulation and practical methods.

Liquids for internal administration	Liquids for external administration or used on mucous membranes
Mixtures and concentrates	Gargles
Syrups	Mouth washes, Throat-paints, Douches
Elixirs	Ear Drops, Nasal drops & sprays, Liniments, Lotions

(b) Biphasic Liquid Dosage Forms :

(i) Suspensions (elementary study) - Suspensions containing diffusible solids and liquids and their preparations. Study of the adjuvants used like thickening agents, wetting agents, their necessity and quantity to be incorporated. Suspensions of precipitate forming liquids like tinctures, their preparations and stability. Suspensions produced by chemical reaction. An introduction to flocculated/non-flocculated suspension system.

(ii) Emulsions-Types of emulsions, identification of emulsion systems, formulation of emulsions, selection of emulsifying agents. Instabilities in emulsions. Preservation of emulsions.

(iii) Semi-Solid Dosage Forms :

- a. Ointments-Types of ointments, classification and selection of dermatological vehicles. Preparation and stability of ointments by the following processes :
 - i. i) Trituration
 - ii. ii) Fusion
 - iii. iii) Chemical reaction
 - iv. iv) Emulsification.
- b. Pastes-Difference between ointments and pastes Bases of pastes. Preparation of pastes and their preservation.
- c. Jellies-An introduction to the different types of jellies and ;their preparation.
- d. An elementary study of poultice.
- e. Suppositories and pessaries-Their relatives merits and demerits, types of suppositories, suppository bases, classification, properties, Preparations and packing of suppositories. Use of suppositories for drug absorption.

(iv) Dental and Cosmetic Preparations :

Institution to Denitrifies, Facial cosmetics, Deodorants, Antiperspirants, Shampoos, Hair dressings and Hair removers.

(v) Sterile Dosage Forms

- a. Parenteral ;dosage forms-Definition, General requirements for parenteral dosage forms. Types of parenteral formulations, vehicles, adjuvants, processing, personnel, facilities and Quality control. Preparation of Intravenous fluids and admixtures-Total parenteral nutrition, Dialysis fluids.
- b. Sterility testing, Particulate matter monitoring-Faculty seals-packaging.
- c. Ophthalmic Products-Study of essential characteristics of different ophthalmic preparations. Formulation additives, special lprecautions in handling and storage of ophthalmic products.

PRACTICAL

Dispensing of at least 100 products covering a wide range of ;preparations such as mixtures, emulsions, lotions, liniments, E.N.T. preparations, ointments suppositories, powders, incompatible prescriptions etc. Books recommended : (Latest editions)

1. Indian Pharmacopeia.
2. British Pharmacopeia.
3. National Formularies (N.F.I., B.N.F.)
4. Remington's Pharmaceutical Sciences.
5. Martindale's Extra Pharmacopeia.

2.2 PHARMACEUTICAL CHEMISTRY-II

Theory

1. Introduction to the nomenclature of organic chemical systems with particulars reference to heterocyclic system containing up to 3 rings.
2. The Chemistry of following Pharmaceutical organic compounds, covering chair nomenclature, chemical , structure, uses and the important Physical and Chemical properties (Chemical structure of only those compounds marked with asterisk (*).

The stability and storage conditions and the different type of Pharmaceutical formulations of these drugs and their popular brand names.

- i. Antiseptics and Disinfectants-Proflavine*, Benzalkonium chloride, cetrimide, ;chloro cresol 8, chloroxylene, Formaldehyde solution, Hexachlorophene, Liquefied phenol, Nitro funantoin. Sulfathiazole, succinyl sulfathiazole, sulfadimethoxine, sulfamethoxy pyrdazine. Sulfa methoxazole, co-trimoxazole, sulfacetamide*.
- ii. Antilleptotic Drugs-clofazimine, Thiambutosine, Dapson*, solapson.
- iii. Anti-tubercular Drugs-Isoniazid*, PAS*, Streptomycin, Rifampicin, Ethambutol*, Thiacetazone, Ethionamide, Cycloserine, Pyrazinamide*.
- iv. Antiamoebic and /anthelmintic Drugs-Emetine, Metronidazole*, Halogenated hydroxyquinolines, diloxanide furoate, Paromomycin Piperazine*, Mebendazole, D.E.C,*.
- v. Antibiotics-Benzyl Penicillin*, Phenoxy methyl Penicillin, Benzathine Penicillin, Ampicillin*, Cloxacillin, Carbenicillin, Gentamycin, Neomycin, Erythromycin, Tetracycline, Cephalexin, Cephaloridine, Cephalothin, Griseofulvin, Chloramphenicol. Antifungal agents-Undecylenic acid, Tolnaftate, Nystatin, Amphotericin, Hamycin.
- vi. Antimalarial Drugs-Chloroquine*, Amodiaquine, Primaquine, Proguanil, Pyrimethamine*, Quinine, Trimethoprim.
- vii. Tranquilizers -Chlorpromazine*, Prochlor P erazine, Trifluo, Perazine, Phiothixene, Haloperidol*, Triperidol, Oxypertine, Chlordiazepoxine, Diazepam*, Lorazepam, Meprobamate.
- viii. Hypnotics:- Phenobarbitone*, Methyprylon, paraldehyde. Triclofos sodium.
- ix. General Anacsthtics-Halothane*, Cyclopropane*, Diethyl ether*, Methohexital sodium, Thiopental sodium, Trichloro ethylene.
- x. Antidepressant Drugs-Amitriptyline, Nortriptyline, Imipramine*, Phenejzine, Tranyl cypromine.
- xi. Analetptics-Theophylline, Caffeine*, Coramine*, Dextro-amphetamine.
- xii. Adrenergic Drugs-Adrenaline*, Noradrenaline, Isoprenaline*, Phenylephrine, Salbutamol, Terbutaline, Ephedrine*, Pseudo ephedrine.
- xiii. Adrenergic Antagonist-Tolazoline, Propranolol *, Practalol.
- xiv. Cholinergic Drugs-Neostigmine*, Pyridostigmine, Pralidoxime, Pilocarpine, Physostigmine*.
- xv. Cholinertgic Antagonists-Atropine*, Hyoseine, Homatropine, Propantheline*, Benztropoine, Tropicamide, Biperiden*.
- xvi. Diuretic Drugs-Furosemide*, Chlorothiazide, Hydrochlorothiazide Benathiazide, Urea*, Mannitol*, Ethacrynic Acid.
- xvii. Cardiovascular Drugs-Ethylinitrite*, Glycerol trinitrate, Alpha methyl dopa, ;Guanethidine, Clofibrate, Quinidine.
- xviii. Hylkpoglycemic Agents-Insulin, Chlorpropamide*, Tolbutamide Glibenclamide, Phenformine*, Metformin.
- xix. Coagulants and Anti Coagulants-Heparin, Thrombin, Menadione*, Blishydrozycoumarin, Warfarin Sodium.
- xx. Local Anaesthetics-Lignocaine*, Procaine*, Benzocaine.
- xxi. Histamine and Anti histaminic Agents-Histamine, Diphen hydramine*. Promethazine, Cyproheptadine, Mepyramine, Pheniramine, Chlorpheniramine*.
- xxii. Non-steridoal anti-inflammatory Agents-Indomethacin*, Phenylbutazone*, Oxyphen butazone, Ibuprofen.
- xxiii. Thurpxome and Antithyroids-Thyroxine*, Methimazole, Methyl thiouracil, Propylthiouracil.
- xxiv. Diagnostic Agents-Inopanoic Acid, Propyliodone, Sulfobromophthalalein
- xxv. Sodium, Indigotindisulfonate Sodium (Indigo Carmine), Evans blue, Congo Red, Fluoreseein Sodium.
- xxvi. Anticonvulsants, cardiac glycosides, Antiarrhythmic antihypertensives & vitamins.
- xxvii. Steroidal Drugs-Betamethazone, Cortisone, Hydrocortisone, prednisolone, Progesterone, Testosterone, Oestradiol Nandrolone.

- xxviii. Anti-Neoplastic Drugs-Actinomycins, Azathioprine, Busulfan, Chlorambucil, Cisplatin cyclophosphamide, Daunorubicin, Hydrochloride, Fluorouracil, Mercaptopurine, Methotrexate, Mytomye.

Books Recommended: (latest editions)

1. Pharmacopeia of India.
2. British pharmaceutical codex.
3. Martindale's Extra pharmacopoeia.

PRACTICAL

1. System qualitative testing of organic drugs involving solubility determination melting point and or boiling point, detection of elements and functional groups (10 compounds)
2. Official identification tests for certain groups of drugs included in the I.P. like barbiturates, sulfonamides, phenothiazines, Antibiotics etc.(8 compounds).
3. Preparation of three simple organic preparations.

2.3 PHARMACOLOGY & TOXICOLOGY

Theory

1. Introduction to Pharmacology, scope of Pharmacology.
2. Routes of administration of drugs, and the factors affecting them. Metabolism, distribution and excretion of drugs.
3. Various processes of absorption of drugs and the factors affecting them. Metabolism, distribution and excretion of drugs.
4. General mechanism of drugs action and the factors which modify drug action.
5. Pharmacological classification of drugs. The discussion of drugs should emphasis the following aspects:
 - i) Drugs acting on the Central Nervous system:
 - a. General anaesthetics, adjunction to anaesthesia, intraveuous anaesthetics.
 - b. Analgesic and non-sterodial antiinflammatory drugs, Narcotic analgesics. Antirheumatic and antigout remedies. Sedatives and Hypnotics, Psychopharmacological agents, anti convulsants, analeptics.
 - c. Centrality acting muscle relaxants and antiparkinsonism agents.
 - ii) Local anaesthetics.
 - iii) Drugs acting on autonomic nervous system.
 - a. Cholinergic drugs, Anticholinergic drugs, anticholinesterases drugs.
 - b. Adrenergic drugs and adrenergic receptor blockers.
 - c. Neurone blockers and ganglion blockers.
 - d. Neuromuscular blockers, drugs used in myasthenia gravis.
 - iv) Drugs acting on eye, mydriatics, drugs used in glaucoma.
 - v) Drugs acting on respiratory system-Respiratory stimulants Bronchodilator, Nasal decongestants, Expectorants and Antitussive agents.
 - vi) Antacids, Physiological role of histamine and serotonin, Histamine and Antihistamines, Prostaglandins.
 - vii) Cardio Vascular drugs, cardiotonics, Antiarrhythmic agents, Antianginal agents, Antihypertensive agents, Peripheral Vasodilators and drugs used in atherosclerosis.
 - viii) Drugs acting on the blood and blood forming organs. Haematinics, Coagulants and acticoagulants, Hemostatics, Blood substitutes and plasma expanders.
 - ix) Drugs effecting renal function-Diuretics and antidiuretics.
 - x) Hormones and hormone antagonists-Hypoglycemic agents, Antithyroid drugs, sex harmones and oral centraceptives corticosteroids.
 - xi) Drugs acting on digestive system-Carminatives, digestant Bitters, Antacids and drugs used in peptic ulcer, Purgative and laxatives, Antidiarrheal, Emetics, Antiemetic, Antispasmodic.
6. Chemotherapy of microbial disease: Urinary antiseptics, Sulfonamides, Penicillins, Streptomycin, Tetracyclines and other antibiotics. Antitubercular agents, Antifungal agents, antiviral drugs, antileprotic drugs.
7. Chemotherapy of protozoal diseases. Anthelmintic drugs.
8. Chemotherapy of cancer.
9. Disinfectants and antiseptics. A detailed study of the action of drugs on each organ is

not necessary.

PHARMACOLOGY PRACTICAL (150 hours)

The first six of the following experiments will be done by the students while the remaining will be demonstrated by the teacher.

1. Effect of K⁺, Ca⁺⁺ acetyl choline and adrenaline on frog's heart.
2. Effect of acetyl choline on rectus abdominis muscle of frog and guinea pigileum.
3. Effect of spasmogens and relazants on rebbits intestine.
4. Effect of local anaesthetics on rabbit cornea.
5. Effect of mydriataics and motics on rabbits eye.
6. To study the action of strychnine of frog.
7. Effect of digitalis on frog's heart.
8. Effect of hypnotics in mice.
9. Effect of convulsants and anticonvulsants in mice or rats.
10. Test for pyrogans.
11. Taming and hypnosis potentiating effect of chlorpromazine in mice/rats.
12. Effect of diphenhydramine in experimentally produced asthma in guinea pigs.

2.4 PHARMACEUTICAL JURISPRUDENCE

Theory

1. Origin and nature of pharmaceutical legislation in India, its scope and objectives. Evolution of the "Concept of Pharmacy" as an integral part of the Health care system.
2. Principles and significance of Professional ethivcs. Critical study of the code of pharmaceutical ethics drafted by pharmacy council of India.
3. Pharmacy Act, 1948- The General study of the pharmacy Act with special reference to Education Regulations, working of State and Central Councils, constitution of these councils and functions. Registration procedures under the Act.
4. The Drugs and Cosmetics Act, 1940- General study of the Drugs and Cosmetics Act the Rules thereunder. Definitions and salient features related to retail and whole sale distribution of drugs. The powers of Inspectors, the sampling procedures and the procedure and formalities in obtaining licences under the rule. Facilities to be provided for running a pharmacy effectively. General ;study of the schedules wit special reference to schedules C,C,F,G,J,H,P, and X and salient features of labelling and storage a conditions of drugs.
5. The Drugs and Magic Remedies (Objectionable Advertisement) Act, 1954- General study of the Act, objectives, special reference to be laid on Advertisements, Magiv remedies and objectionable and permitted advertisements-diseases which cannot be claimed to be cured
6. Narcotaic Drugs and Psychotropic Substances Act, 1985-A * study of the Act with special reference to its objectives, offences and punishment.
7. Brief introduction to the study ;of the following acts:
 1. Latest Drugs (Price Control) order in force.
 2. Poisons Act 1919 (as amended to date)
 3. Medicinal and Toilet Preparations (Excise Duties) Act, 1955 (as amended to date)
 4. Medical Termination of Pregnancy Act, 1971 (as amended to date)

BOOKS RECOMMENDED (Latest edition)

Bare Acts of the said * published by the Government.

2.5 DRUG STORE AND BUSINESS MANAGEMENT

Theory

Part I Commerce

1. Introduction-Trade, Industry and Commerce, Functions and subdivision of Commerce, Introduction to Elements of Economics and Management.
2. Forms of Business organizations.
3. Channels of Distribution.
4. Drug House Management-Selection of Site, Space Layout and legal requirements. Importance and objectives of Purchasing, selection of suppliers, credit information, tenders, contracts and price determination and legal requirements thereto. Codification, handling of drug stores and other hospital supplies.
5. Inventory Control-objects and importance, modern techniques like ABC, VED analysis, the lead time, inventory carrying cost, safety stock, minimum and maximum stock levels, economic order quantity, scrap and surplus disposal.
6. Sales Promotion, Market Research, Salesmanship, qualities of a salesman, Advertising and Window Display.
7. Banking and Finance-Service and functions of bank, Finance planning and sources of finance.

Part II Accountancy

1. Introduction to the accounting concepts and conventions, double entry, Book keeping, Different kinds of accounts.
2. Cash book.
3. General ledger and trial balance.
4. Profit and loss account and balance sheet.
5. Simple techniques of analyzing financial statements. Introduction to Budgeting.

Books Recommended (Latest editions)

1. Remington pharmaceutical science

2.6 HOSPITAL AND CLINICAL PHARMACY

Theory

Part I Hospital Pharmacy :

1. Hospitals Definition, Function, Classifications based on various criteria, organization, Management and health delivery system in India.
2. Hospital Pharmacy :
 - (a) Definition
 - (b) Functions and objectives of Hospital Pharmaceuticals services.
 - (c) Location, Layout, Flow chart of materials and men.
 - (d) Personnel and facilities requirements including equipments based on individual and basic needs.
 - (e) Requirements and abilities required for Hospital Pharmacists.
3. Drug Distribution system in Hospitals :
 - (a) Outpatient services
 - (b) Inpatient services:- (a) types of services (b) detailed satellite pharmacy services, Central sterile services, Bed side Pharmacy.
4. Manufacturing :
 - (a) Economics considerations, estimation of demand.
 - (b) Sterile manufacture-large and small volume parenteral, facilities, requirements layout, production planning, manpower requirements
 - (c) Non-sterile manufacture-Liquid orals, externals, Bulk concentrates
 - (d) Procurement of stores and testing of raw materials
5. Nomenclature and uses of surgical instruments and * equipments and health accessories

6. P.T.C. (Pharmacy Therapeutic Committee), Hospital Formulary system and their organizations, functioning, composition
7. Drug Information service and Drug Information Bulletin
8. Surgical dressing like cotton, gauze, bandages and adhesive tapes including their pharmacopoeial tests for quality. Other hospital supply eg. I.V. sets, B.G. sets, Ryals tubes, ;Catheters, Syringes etc
9. Application of computers in maintenance of records, inventory control, medication monitoring, drug information and data storage and retrieval in hospital and retail pharmacy establishments.

Part II: Clinical Pharmacy

1. Introduction to Clinical Pharmacy Practice-Definition, scope.
2. Modern dispensing aspects-Pharmacists and Patient counselling and advice for the use of common drugs, medication history.
3. Common daily terminology used in the practice of Medicine.
4. Disease, manifestations and pathophysiology including salient symptoms to understand the disease like Tuberculosis, Hepatitis, Rheumatoid Arthritis, Cardio-Vascular diseases, Epilepsy, Diabetes, Peptic Ulcer, Hypertension.
5. Physiological parameters with their significance.
6. Drug Interactions :
 - (a) Definition of Drug Interaction
 - (b) Mechanism of Drug Interaction
 - (c) Drug-drug interaction with reference to analgesics, diuretics, cardio vascular drugs, Gastrointestinal agent Vitamins and Hypoglycemic agents
 - (d) Drug-food interaction
7. Adverse Drug Reactions :
 - (a) Definition and significance
 - (b) Drug-induced disease and Teratogenicity.
8. Drugs in clinical Toxicity-Introduction, general treatment of poisoning, systematic antidotes. Treatment of insecticide poisoning, heavy metal poison, Narcotic drugs, Barbiturate, Organophosphorus poisons.
9. Drug dependences, Drug abuse, Addictive drugs and their treatment, complications.
10. Bio-availability of drugs, including factors affecting it.

Books Recommended (Latest editions)

1. Remington's pharmaceutical sciences.
2. Martinadale's Extra Pharmacopoeia.

PRACTICAL

1. Preparation of transfusion fluids.
2. Martindale's Extra pharmacopoeia.
3. Evaluation of surgical dressings.
4. Sterilization of surgical instruments, glass ware and other hospital supplies.
5. Handling and use of data processing equipments. (See Regulation 9)
